

Providing Professional Environmental Services to the Region...

ASI is the environmental services company that industry has come to rely on for all their liquid waste management needs. With unparalleled service standards, an experienced, well-trained staff, a reputation for integrity and a commitment to earning the trust of every customer, it is no wonder that ASI is the name industry relies on for environmental solutions.

More than a tradition of professionalism and trust, ASI offers real cost savings and other benefits to our customers. ASI provides quality products and services that help ensure the safety of your workforce, your customers and your environment. Not only will you lower your operational costs by establishing recycling as part of your companies' protocol, you will also become a better steward of the natural resources we all share.

For fast, compliant, and economic results, let ASI be your environmental service solution.

SOIL REMEDIATION

Bug Man Natural Products include:
Shur-Step Surface Cleaner for oil and grease spills on hard surfaces
Soil Guard Bio Treatment for remediation of light and shallow depth hydrocarbon contamination
Bug Man's Liquid Cleaner for cleaning and maintaining various oily surfaces

Bugman products are a specialized, highly concentrated grouping of naturally occurring microbes that remediate hydrocarbons. The products are blended to bioremediate simple, complex and chlorinated hydrocarbons. Pollutants are recycled to natural compounds which aid in soil reclamation and fertilization.
